PROFILE

Cybersecurity and GRC practitioner with a BSc in Microbiology and practical experience in information security, risk management, vulnerability assessment, ISO/IEC 27001 audit activities and cybersecurity education. I transitioned into cybersecurity through structured training, practical internships, professional programmes and independent projects.

My experience includes risk assessment, control evaluation, vulnerability assessment, network traffic analysis, security awareness and audit reporting. I have also developed practical cybersecurity tools, including **CyberSafe SME**, an AI-powered risk and compliance tool for small businesses, and **ScamShield**, a tool for checking suspicious messages and links. I am seeking postgraduate study to deepen my technical, analytical and research skills and build stronger expertise in cybersecurity management and risk.

EDUCATION

Federal University of Wukari, Taraba, Nigeria

BSc Microbiology | Nov 2016 – Jul 2021

PROFESSIONAL EXPERIENCE

SKYHub Nigeria — Cybersecurity Instructor

Part-time | Jul 2026 – Present | Remote

- Deliver practical cybersecurity training to beginners and early-career learners.
- Develop presentations, exercises and learning activities covering cybersecurity fundamentals, threats and safe online practices.
- Teach GRC and risk-management concepts, including business risks, compliance and security controls.
- Deliver awareness sessions on phishing, social engineering, password security and data protection.
- Provide guidance and mentoring to learners interested in cybersecurity, GRC and information security.

Interswitch Group — Information Systems Control & Risk Management

Job Shadowing Programme | May 2025 – Mar 2026 | Remote

- Developed practical knowledge of information-systems controls, cybersecurity risk management and security practices.
- Applied risk identification, assessment, control evaluation, mitigation and monitoring principles.
- Completed an assessment focused on Information Systems Control Analysis.
- Analysed a simulated cybersecurity incident involving a digital payments organisation, considering cybersecurity, operational, compliance and business-continuity risks.

Hacktify Cyber Security — Cybersecurity Intern

Feb 2025 – Mar 2025 | Remote

- Captured and analysed network traffic using **Wireshark**.
- Configured basic firewall controls to restrict unauthorised network access.
- Applied **WPA3 encryption** during practical network-security activities.

Shadow Defense — Cybersecurity Intern

Dec 2024 – Jan 2025 | Remote

- Conducted vulnerability-assessment activities and network reconnaissance using **Nmap**.
- Captured and analysed network traffic using **Wireshark**.
- Documented security findings and observations in technical reports.
- Gained practical exposure to security controls, policies and compliance.

SKN IT Assurance Consulting — Cyber Security Consultant

Feb 2024 – Dec 2024 | Hybrid, Nigeria

- Supported vulnerability assessments for client environments.
- Assisted with cybersecurity awareness training for client staff.
- Documented security findings and communicated recommendations.

SELECTED PROJECTS

CyberSafe SME — AI-Powered GRC & Risk Tool

- Built an AI-powered tool to help small businesses identify cybersecurity risks and generate structured risk and compliance reports.
- Developed plain-English, sector- and jurisdiction-aware recommendations.
- Built using **HTML**, **JavaScript** and **Node.js**, with deployment through GitHub Pages and Render.

ScamShield — Cybersecurity Awareness Tool

- Built a practical awareness tool that allows users to check suspicious messages and links before interacting with them.
- Designed to promote safer online behaviour and improve awareness of phishing and scams.

TrustPay — ISO/IEC 27001:2022 Internal Audit Simulation

- Conducted a simulated internal audit for a fictional fintech organisation.
- Performed gap analysis, assessed security controls and developed a risk register.
- Documented audit findings and recommended corrective actions.

LEADERSHIP & TEACHING

GRC Training Programme

- Organised and delivered a GRC learning programme covering GRC fundamentals, small-business risks and compliance principles.
- **27 participants registered; 25 completed** the programme.
- Provided follow-up guidance to participants interested in GRC and compliance careers.

3MTT Cybersecurity Training

- Invited as a trainer and delivered practical cybersecurity sessions to approximately **50 participants**.
- Designed learning materials and supported participants through cybersecurity fundamentals and practical activities.
- Continued mentoring learners interested in developing cybersecurity careers.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- **ISO/IEC 27001:2022 Lead Auditor** — Mastermind Assurance, 2025
- **ISO/IEC 27001:2022 ISMS Foundation** — Standards and Best Practice, 2025
- **ISO 31000:2018 Risk Management Foundation** — Standards and Best Practice, 2025
- **ISO/IEC 27032:2023 Guidelines for Cybersecurity Foundation** — Standards and Best Practice, 2025
- **Mastercard Cybersecurity Job Simulation** — Forage, 2024
- **AIG Shields Up: Cybersecurity Job Simulation** — Forage, 2024
- **Cisco CCST Cybersecurity Training**

TECHNICAL & PROFESSIONAL SKILLS

Cybersecurity: Vulnerability Assessment | Network Security | Web Application Security Assessment | Nmap | Wireshark | Firewall Fundamentals | Security Awareness

GRC & Risk: Governance, Risk & Compliance | IT Risk | Risk Assessment | ISO/IEC 27001 | ISO 31000 | Internal Audit | Control Evaluation | Compliance | Risk Registers

Technology: HTML | JavaScript | Node.js | GitHub | GitHub Pages | Render

Professional: Research & Analysis | Technical Reporting | Cybersecurity Training | Communication | Mentoring

ACADEMIC INTERESTS

Cybersecurity Management | GRC | IT Risk | Information Security | Cybersecurity Risk Management | SME Cybersecurity | Security Awareness | Cloud Security | Network Security
